## CARREER SUMMARY

I have been working as a full-stack web developer in MKI Hellas for 3 years. During my time there I implemented features, managed projects and co-operated with my team to deliver diverse products for the needs of diverse customers. I learned and trained others on a number of different topics and I provided support to customers, when needed, as a part of the company's incident management process. I am currently pursuing a Java Developer career, as I am very enthusiastic about Java. Even though I never had the opportunity to work extensively with Java on a professional environment, I am confident that I can make it, since I have comprehensive knowledge concerning Object Orienting Programming and a passion for Java.

## WORK EXPERIENCE

Software Developer

October 2016 - July 2019

I implemented features across diverse projects in both front-end and back-end. Among my responsibilities as a team leader on a number of projects, was planning sprints and refining user-stories after communicating with the customer and the team. I took part in the quality assurance process through the development of UI and Unit tests.

Achievements:

- Designed and implemented end-to-end solutions with ExtJS/C#/SSMS
- Performed tasks to program progress including developer allocation, time and team management
- Obtained deep understanding and technical knowledge of quality control and automated testing while developing a UI testing solution with Selenium/Java/Katalon
- Expanded my knowledge on both software and business topics
- Achieved personal satisfaction through the work I delivered
- Grew my co-operation and communication skills
- Became a dependable and important member to the company
- Met capable individuals which I respect both as professionals and as personalities

Used Technologies:

HTML/CSSJavaScriptExt.JSC#Transact SQLNUnitSelenium WebdriverKatalonJava

Software Developer (Intern)

April 2016 – September 2016

I familiarized myself with the development cycle and managing my time in order to actively and efficiently partake in the development process. I implemented and provided support for features regarding the back-end. I had the opportunity to work in a multicultural and friendly environment.

Used Technologies:

C#Transact SQLNUnit

MKI Hellas

MKI Hellas

## ACADEMIC PROJECTS

Data Structure Visualization for Stacks and Queues

March 2019 - August 2019

Created an application where the user can be informed through theory or through an elaborate visualization on how operations and exceptional behaviours of stack and queue data structures work.

Used Technologies:

JavaFXJavaGitMavenJUnit

Image - Messaging application

October 2015 - January 2016

Worked on a project that utilized the user's current location and displayed proximate friends that used the app. The users were able to connect through personal messages and through the exchange of multimedia.

Used Technologies:

JavaSpringGitMavenJUnitMockitoHibernateSQL

Thesis

Class Project

## PERSONAL PROJECTS

Text-based Adventure Game

April 2016 – September 2017

Created a web app for a text based adventure game (interactive fiction) where the user is prompted to use a text based user interface instead of a graphical one.

Used Technologies:

JavaSpringGitMavenJUnitAngularMongoDB

Project

## SKILLS & TOOLS

Frontend

Angular

JavaScript

HTML/CSS

Backend

C#

Java

SQL

Others

GitJIRAUnit TestingBash ScriptingSelenium WebdriverKatalonPerforceMaven

## EDUCATION

BSc Software Engineering

International Hellenic University (Serres, Greece)

2010 - 2019

## LANGUAGE

Greek (Native)  
English (Professional)  
German (Elementary)

## INTERESTS

Programming  
Gaming  
Math  
Music  
Cinema  
Travelling  
Trekking
