CAREER SUMMARY

I have been working as a full-stack web developer in MKI Hellas for 3 years. During my time there I implemented features, managed projects and co-operated with my team to deliver diverse products for the needs of diverse customers. I learned and trained others on a number of different topics and I provided support to customers, when needed, as a part of the company's incident management process. I am currently pursuing a Java Developer career, as I am very enthusiastic about Java. Even though I never had the opportunity to work extensively with Java on a professional environment, I am confident that I can make it, since I have comprehensive knowledge concerning Object Orienting Programming and a passion for Java.

WORK EXPERIENCE

○ **Software Developer** MKI Hellas
October 2016 - July 2019

I implemented features across diverse projects in both front-end and back-end. Among my responsibilities as a team leader on a number of projects, was planning sprints and refining user-stories after communicating with the customer and the team. I took part in the quality assurance process through the development of UI and Unit tests.

Achievements:

- Designed and implemented end-to-end solutions with ExtJS/C#/SSMS
- Performed tasks to program progress including developer allocation, time and team management
- Obtained deep understanding and technical knowledge of quality control and automated testing while developing a UI testing solution with Selenium/Java/Katalon
- Expanded my knowledge on both software and business topics
- Achieved personal satisfaction through the work I delivered
- Grew my co-operation and communication skills
- Became a dependable and important member to the company
- Met capable individuals which I respect both as professionals and as personalities

Technologies used:

HTML/CSS JavaScript Ext JS C# Transact SQL NUnit Selenium Webdriver Katalon Java

○ **Software Developer** (Intern) MKI Hellas
April 2016 – September 2016

I familiarized myself with the development cycle and managing my time in order to actively and efficiently partake in the development process. I implemented and provided support for features regarding the back-end. I had the opportunity to work in a multicultural and friendly environment.

Technologies used:

C# Transact SQL NUnit

SKILLS & TOOLS

Frontend

Backend

Others

Git JIRA Unit Testing Bash Scripting
Selenium Webdriver Katalon Perforce
Maven

EDUCATION

BSc Software Engineering
International Hellenic University (Serres, Greece)
2010 - 2019

LANGUAGE

Greek (Native)
English (Professional)
German (Elementary)

ACADEMIC PROJECTS

0 Data Structure Visualization for Stacks and Queues 🐱

Thesis

March 2019 - August 2019

Created an application where the user can be informed through theory or through an elaborate visualization on how operations and exceptional behaviours of stack and queue data structures work.

Technologies used:

JavaFX Java Git Maven JUnit

0 Image - Messaging application 🐱

Class Project

October 2015 - January 2016

Worked on a project that utilized the user's current location and displayed proximate friends that used the app. The users were able to connect through personal messages and through the exchange of multimedia.

Technologies used:

Java Spring Git Maven JUnit Mockito Hibernate SQL

INTERESTS

Programming
Gaming
Math
Music
Cinema
Travelling
Trekking

PERSONAL PROJECTS

0 Text-based Adventure Game 🐱 🐱

Project

April 2016 – September 2017

Created a web app for a text based adventure game (interactive fiction) where the user is prompted to use a text based user interface instead of a graphical one.

Technologies used:

Java Spring Git Maven JUnit Angular MongoDB
